OBJECTIVE

Computer Science graduate (GPA 3.35/4.0) with a 5-month co-op at **Saudi Arabia Railways** building full-stack operations tooling in **React** and **Laravel**. **First place** in the Jubail Industrial College **Competitive Programming Contest**, and **first place in Sakanthon 2026's Financial Solutions track (350+ teams)**. Experienced in **REST API** design, **relational database modeling**, **Power BI** dashboards, and **Git workflows**. Seeking a **junior software** or data role in Riyadh; open to relocation.

EDUCATION

Bachelor of Computer Science, Jubail Industrial College
GPA: 3.35 / 4.0

2021 – 2026
Jubail, Saudi Arabia

PROFESSIONAL EXPERIENCE

Saudi Arabia Railways (SAR), Co-op trainee

01/2026 – 05/2026

Dammam

- Built a train operations management system with **React** and **Laravel**, delivering 6+ data-entry modules across the operations workflow
- Designed the relational schema and **REST endpoints** connecting the **React** front end to the **Laravel** back end
- Developed a **Power BI** dashboard with 9 report pages tracking fleet assets across multiple sites, ingesting daily Excel exports and modeling them in DAX
- Collaborated with the operations team over 5 months, using **Git** for version control

PROJECTS

Train Operations Web Application

- Developing a full-stack web application using React and Laravel
- Managing and tracking train operations (trips, wagons, cargo)
- Implementing data entry forms and automated workflows
- Creating dashboards to monitor key performance metrics (KPIs)

Graduation Project - Diabetic Retinopathy Detection System

- Developing a machine learning model for automated retinal image analysis.
- Aiming to support early detection of diabetic retinopathy in patients.
- Developed machine learning models for prediction.

Job Radar — Automated Job Alert System

- Built a Python service that queries the JSearch API for new job postings and pushes matches to Telegram in real time
- Implemented a five-layer filtering engine with deduplication state, so repeat listings are never sent twice
- Scheduled hourly runs on GitHub Actions; written with zero third-party dependencies using only the standard library
- Added a CLI with configurable flags and unit test coverage for the filter and dedup logic

CERTIFICATES

Google – Foundations: Data, Data, Everywhere (Google) — Completed an introductory course in data analytics covering key concepts, tools, and processes used by data analysts. Gained practical skills in data cleaning, analysis, and visualization using spreadsheets, SQL, R, and Tableau.

Python for Data Analysis: Pandas & NumPy — (Coursera Project Network) — Hands-on project applying Python's Pandas and NumPy for efficient data manipulation, cleaning, and analysis.

AWARDS

Winner – 1st Place, Financial Solutions Track — Sakanthon 2026, Sakan Foundation

09/2026

- Achieved 1st place among 350 participants

First Place in Competitive Programming Contest (CPC), Computer Club at Jubail Industrial College.

03/2024

SKILLS

- | | | | |
|------------------------------|-------------------------|-----------------------------|------------------|
| • React | • Laravel | • REST APIs | • Git & GitHub |
| • Full-Stack Web Development | • Database Design & SQL | • UI/UX & Responsive Design | • Power BI & DAX |

LANGUAGE

Arabic
Native language.

English
Professional level of proficiency.
